

# Human Readiness In One-Click

CybeReady provides a next-generation employee training solution for cyber security leaders, looking to go beyond Awareness.

With CybeReady, employees enjoy short, engaging learning content, organizations build Readiness to cyber attacks, and security teams achieve efficiency - without any dedicated IT resources.

CybeReady's solution includes the expertise needed to implement an effective employee readiness program out-of-the box.

The impact on culture and behavior change is achieved via a proprietary methodology that creates a Ripple Effect: aggregation of small actions, short employee engagements and learning data add up to yield a significant, measurable impact on organizational resilience.

## **BLAST**

### **Phishing Simulations & Learning**

Continuous Phishing Simulations and Learning solution trains employees to detect and avoid phishing attacks. Content adapts based on employee's performance and location (in 40 languages) and provides personalized and effective learning experiences.

## **AuditReady**

### **Free-Hassle Compliance**

AuditReady allows you to achieve, maintain and prove compliance with ease. It automatically sends mandatory security content to employees, tracks their completion and generates one-click reports.

## **CAB**

### **Continuous Awareness Bites**

Awareness bites & quizzes are sent to employees' inbox continuously for a short (30- second), learning experience. Training covers all topics required by NIST, including: Passwords, Clean Desk Policies, Removable Devices, Privacy, Phishing & more.

## **PhishCage**

### **Employee email reporting button**

Prompts employees to report suspicious emails and provides immediate feedback and learning reinforcement with every engagement. PhishCage analytics display comprehensive data on employee progress over time.

## THE IMPACT

# 100%

Complete workforce  
training every month

# 8X

Reduction in  
high-risk group

# 4X

Increase in  
employee resilience
